# d30 Random Book Subject/Title Generator
## By Christopher Stogdill (AKA the Frugal GM)

This generator is an accompaniment to FGM037c: Random Book Generator Table. The idea with this table is to quickly generate a title and subject matter for the book created with the aforementioned table. While I was creating this generator, I assumed that when the subject of a book was about a race that half would be about humans and the other half about humanoids or demi-humans. In order to increase the total number of subjects to 30, I culled duplicate references and made two sub-tables. One is populated with non-human races/monsters and the other is a blank table. The GM can populate Table 2a with the various human "races" available in the campaign, or you can just omit it and decide wether to roll on Table 2b or just go with the generic "human".

**Using these tables:** Roll 1d30 on Table 1 and 3, joining the results (*i.e. Rolls of 10 and 17 would result in a title of "Review of Heraldry"*). Rolls on Tables 2a or 2b are at the GM's discretion.
